

# PHI LASHES

## POST TREATMENT CARE

IN ORDER TO ENSURE YOUR NEW VALUABLE EXTENSIONS KEEP THEIR DESIRED EFFECT FOR LONGER, PLEASE FOLLOW THE AFTERCARE INSTRUCTIONS IN THIS BOOKLET

### DURING THE FIRST 24 HOURS

THIS IS THE MOST CRUCIAL STAGE FOR ENSURING THE LONGEVITY OF YOUR EXTENSIONS. DO NOT GET YOUR NEW LASHES WET: EVEN STEAM FROM THE SHOWER CAN AFFECT THE QUALITY OF THE FRESH BOND.

**24-28 HOURS**-AVOID PROLONGED CONTACT WITH WATER SUCH AS SWIMMING, AVOID ANY HOT AND HUMID ENVIRONMENT SUCH AS SAUNAS, STEAM ROOM AND JACUZZI. WHEN TAKING A BATH OR SHOWER AVOID DOING SO WITH VERY HOT WATER.

**AFTER 24 HOURS**- DO NOT USE OIL BASED PRODUCTS ON THE AREA AROUND THE EYES PARTICULARLY WATERPROOF MASCARA. IF YOU FEEL IT ABSOLUTELY NECESSARY TO USE MASCARA, IT MUST BE WATER SOLUBLE. BE GENTLE WITH YOUR NEW LASHES, AVOID CONTINUOUS TUGGING, RUBBING OR PULLING OF THEM. DO NOT USE MECHANICAL EYELASH CURLERS. IF YOU TRY TO CURL YOUR NEW LASHES , THEY COULD BREAK OFF, ONLY USE LINT FREE APPLICATORS AND LINT FREE MAKEUP REMOVER CLOTHS AROUND THE EYES. AVOID USING COTTON WOOL OR TOWELS AS THEY CAN EASILY GET CAUGHT AND TUG ON THE EXTENSIONS. DO NOT TINT OR PERM WHILE WEARING EYELASH EXTENSIONS. IF YOU WISH TO TINT YOUR NATURAL LASHES, THIS MUST BE DONE BEFORE APPLICATION.

**TIPS:** TAKE CARE WHEN BLOW- DRYING YOUR HAIR, AS EXCESSIVE HEAT CAN CAUSE THE EXTENSIONS TO LOSE THEIRS CURL. GENTLY COMB THROUGH YOUR NEW LASHES EACH MORNING TO MAINTAIN A GOOD APPEARANCE.

**IN-FILLS**- EACH INDIVIDUAL EYELASH HAIR HAS A NATURAL GROWTH CYCLE – CERTAIN EYELASH HAIRS WILL HAVE MATURED AND BE READY TO NATURAL DROP OUT, WHILE OTHERS ARE JUST STARTING TO GROW. THIS IS THE MAIN REASON FOR GAPS APPEARING IN YOUR EXTENSIONS. DEPENDING ON YOUR OWN NATURAL EYELASH GROWTH CYCLE AND HOW WELL YOU FOLLOW THIS AFTER CARE INSTRUCTIONS, WE RECOMMEND YOU ATTEND INFILLS APPOINTMENT EVERY 3-4 WEEKS TO PROLONG THE DESIRED EFFECT OF THE LASHES. YOU MAY NEED TO ATTEND MORE FREQUENTLY IF YOU HAPPEN TO HAVE A FASTER GROWTH CYCLE.

**CAUTION:** IF AN ALLERGIC REACTION IS SUSPECTED SUCH AS SWELLING REDNESS OR PUFFINESS CONTACT YOUR THERAPIST. IN SEVERE CASE SEEK MEDICAL ADVICE. EYELASH EXTENSIONS ADHESIVE GENERALLY CONTAIN CYANOACRYLATE. NEVER ATTEMPT REMOVE YOURSELF.
